WOULD USE WELL ASK \$301,600 DAMAGES

Some Persons Favor Installing Pumping Plant.

WHAT TACOMA IS DOING

tem is to be under the supervision of Lucien Forrest McConihe, a hydraul-ic engineer of \$100,000 damages in the first and \$101,200 and costs in the secic engineer of experience and high

would cost the same for 15,000,000 gallons as it would for 2,000,000 or 3,000,000 gallons. The law provides for eighthour shifts. This requires three men for each day. You can white the dailons. The law provides for eighthour shifts. This requires three men for each day. You can explain to the proper authorities that the labor cost of the water was \$2.28 per million gallons, or a total cost, per 1.000,000 gallons of \$4.18. Pumping but 15,000,000 gallons per twenty-four hours instead of 25,000,000 gallons, as I stated in my letter to the city council, which I enclose to you, the cost would be but letter to the city council, which I en-close to you, the cost would be but 55 cents per one million gallons pumped

of the right quality to be used for culinary purposes or that a sufficient supply could be developed from the springs in that part of the city or from artesian wells at a reasonable depth. The latest official information on the subject is not encouraging. This is contained in a report made to the city council by City Engineer F. C. Kelsey, July 20, 1900. The council at the meeting of July 12 passed a resolution calling upon Mr. Kelsey for an estimate on the cost of pumping the water at the park and extending the water mains so as to put the water pumped into the city system. into the city system.

Mr. Kelsey submitted in his report four bids from local firms on the cost of a pump with a capacity of 2,000,000 gallons every twenty-four hours and an eighty-horsepower boiler. The bids ranged from \$5,700 to \$11,300. The other thems of cort in the liters of cort. items of cost in the development of the water were: Sump, \$2,000; cleaning the wells, \$600; foundation, \$400; buildings, \$2,000; water mains and connections, \$20,000; incidentals, \$1,250. Total, \$26,-250. The total cost of the plant was put at between \$34,000 and \$40,000, and this does not include the cost of operatpipe to run from the pumps east two blocks to connect with a 6-inch main on Eighth and Ninth East, and also r 12-inch main on Seventh East from

Tenth to Seventh South streets, with 6-inch and 10-inch connections.

The report set forth that part of the water from the wells was seepage water from irrigation, proved by the fact that the flow decreased after the irrigating season was over. In the winter of 1898 the flow was less tham 800,000 gallons every twenty-four hours.

Many Solids in the Water.

Mr. Kelsey's report also included an analysis of the water made by Professor Hadley of the University of Utah. This report of the chemist said of the water from the artesian wells: "The amount of total solids would condemn it, being over 600 parts to the M."
Of the water from the springs Professor Hadley's report said: "While it may be safe, I would not like to recommend it for domestic use: more solid matter

the flow of water here has largely de-creased in recent years. Some attribute creased in recent years. Some attribute this to the fact that the wells have become stopped up. They claim that if they were cleaned out and kept clear the flow of water would be greatly increased. Objection to the use of the water is largely based on the understanding that the water—part of it, at least—is seepage, and that this seepage must of necessity carry with it many impurities from the farms and houses above where the water is brought to the surface.

Prepident.

Vernal. Nov. 28.—The quarterly stake boundered to the Mormon church was neld yesterday and today at the, stake house. Some curiosity was manifested as to the course that would be taken regarding the sustaining of R. S. Collett, now under arrest for embezzlement of postofice funds, in his office as first counselor to the stake president. Collett name was presented as usual and he was sustained along with the rest.

The statement was made that Collett aversed that he had done no intentional wrong, and until the courts decreed otherwise his statement was entitled to consideration.

AT LIBERTY PARK Man and Wife Declare That Their Personal Injuries Are

ANALYSES SHOW WATER UNFIT

FOR CULINARY PURPOSES.

Some men of Salt Lake still adhere to the belief that a sufficient supply of good water for the Leeds of the city can be developed from the flowing wells and springs south of Liberty park. In support of their contention they cite the experience of Tacoma, Wash.

This year Tacoma found her water supply inadequate and a movement was inaugurated to increase it, either by gravity from mountain streams or by pumping from artesian wells. After a thorough investigation by a special committee of the city council it was taken and the right eye was seriously impaired.

Man Taylor these suits Mrs. Edna E. Taylor is plaintiff, and the second suit is brought by her huishand. William A. Taylor Mrs. Taylor alleges that on Feb. 19 she was in the employ of the defendant corporation as telegraph operator at Jackson Station. She and her husband, who was also in the employ of the company, lived in the depot building, in accordance with an arrangement made between the company and her husband. When the explosion occurred, which was caused by a collision between the train in which damages aggregating the type is plaintiff, and the second suit is brought by her huishand. William A. Taylor Mrs. Taylor alleges that on Feb. 19 she was in the employ of the de-fedant corporation as telegraph operator at Jackson Station. She and her husband, who was also in the employ of the company, lived in the depot building in accordance with an arrangement made between the company and her husband. When the explosion occurred, which was caused by a collision between the train in which the employ of the company and her husband. When the explosion occurred, which was caused by a collision between the train in which the car on taining of the proposition of the company and her husband. When the explosion occurred, which was caused by a collision between the train in which the car on taining of the c

she lost the sight of her left eye, and the sight of the right eye was seriously impaired.

Mrs. Taylor alleges that the injuries she received were the outcome of gross carelessness upon the part of the defendant company and of the incompetency of the long are to be pumped from wells in South Tacoma. It is necessary to go down about 125 feet for this water. It is to be elevated into a scries of reservoirs and standpipes and the entire city supplied in this way.

The city council of Tacoma at its regular session Nov. 14 voted in favor of the new system and work is to start at once on the wells. Two wells are already furnishing water and other wells will be sunk as fast as needed. The work of installing this new system is to be under the supervision of Lucien Forcest McConibe a hydrout.

She lost the sight of the right eye was seriously impaired.

Mrs. Taylor alleges that the injuries she received were the outcome of gross care-lessness upon the part of the defendant company and of the incompetency of the same seems upon the part of the defendant company and of the incompetency of the defendant compa

Mrs. Reed Wins Appeal.

Writing to a friend in this city in regard to the cost of pumping the water, Mr. McConihe says:

Tacoma Water Is Cheap.

"The water pumped the past month of October. 1904, cost for power \$1.99 per one million gallons. This does not include labor, which, you understand, would cost the same for 15,000,000 gala.

With McConihe says:

The supreme court yesterday handed down an opinion in the diverce suit of Lila Read against Charles Read, upholding the decree of the district court, which granted her \$70 a month alimony. The husband appealed the case on the ground that the amount was excessive. The court holds that while the sum is liberal, it is not too much, as Read earns from \$250 to \$300 a month and keeps up a \$16,600 house.

Jury Commissioners Named.

Court Notes.

and labor combined per one million gallons pumped to the surface of the ground with a fifty-foot lift."

Electrical power is used in operating the Tacoma pumps. The bill submitted to the city council for October provided for power—36,238 K. W. hours at \$.003; power for compressor, \$104; lights Justice R. N. Baskin of the state of the attorney for Thomas Jones argue the attorney for Thomas Jones argue the motion for a new trial of the \$5 damage suit against Salt Lake City. Jones slipped on some icy steps last winter and was injured. He brought an action against the city, but was non-suited when the case was tried last spring.

Justice R. N. Baskin of the attorney for Thomas Jones argue the motion for a new trial of the \$5 damage suit against Salt Lake City. Jones slipped on some icy steps last winter and was injured. He brought an action against the city, but was non-suited when the case was tried at the attorney for a new trial of the \$5 damage suit against Salt Lake City. Jones slipped on some icy steps last winter and was injured. He brought an action against the Court Notes.

of the city council for October provided for power—36,338 K. W. hours at \$.003; power for compressor, \$104; lights, \$5. The amount of water pumped was \$64,950,009 gallons—1.000,000 gallons for 1 cent. In October there were but two wells running. Under the completed system the cost per million gallons is expected to be greatly reduced.

The geological formation under Tacoma gives the city an unlimited supply of this water and it is demonstrated to be pure and wholesome.

Facts About Liberty Park.

Local advocates of the Liberty park pumping plan for the supply of Salt Lake have not been able up to this time to demonstrate that the water is of the right quality to be used for culinary numoness or that a subject with the suit was over an agreement and agreed by purposes of the case of Eliza English, appelant, against Joseph Openshaw, respondent. The suit was over an agreement and agreed against him and releases him from custody. Divorce proceedings are still pending and are being contested.

FARMERS IN SESSION

Hear Able Addresses and Exchange Ideas on Agricultural Topics.

Filimore, Nov. 22—The Miliard County Farmers' Institute held three sessions here today, convening at the court house at 16 o'clock a. m. Dr. Widtsoe, Professor R. W. Ciark and Miss Lydia Holmgreen of the Agricultural college were in attendance, and a good representation from different parts of the county. First Vice President William A. Reeve presided. The first on the programme was a welcome speech by Mayor N. S. Bishop, after which the chairman introduced Dr. Widtsoe, who said that he and his companions had come to visit us and discuss some of the principles of intelligent agriculture and, domestic economy. He spoke of the benefit of meeting together and exchanging ideas for mutual imformation, and at some length about the wonderful progress that had been made in scientific knewledge and practical applications of principle in agriculture during the last 150 years, and explained many things about the workings of nature in plant growth. illmore, Nov. 29 .- The Millard Coun

about the workings of nature in plant growth.

Miss Holmgreen spoke very instructively upon the necessity of sanitary conditions in and around the house, pointing out how sickness and untimely death, which we very often charge to Providence, come to us through our carelessness or ignorance. At the afternoon session Professor Clark gave a very instructive Jecture on horses and cattle, answering many questions on the treatment of diseases in demestic animals.

The subject of arid farming was then taken up by Dr. Widtsoe and treated in a manner that was much appreciated by a good-sized audience, and many questions were asked and answered, bringing out many points of information on that sub-

Of the water from the springs Professor Hadley's report said: "While it may be safe, I would not like to recommend it for domestic use; more solld matter than well water, rendering it more objectionable."

Two years ago measurements by the city engineer's office showed a total flow from the wells and springs of 1.000,000 gallons every twenty-four hours. It is a well known fact that the flow of water here has largely de-
